Act as a hit-making electronic music producer. We are engineering the ultimate 'Sad Banger'—a track that contrasts a heavy, driving club instrumental with devastatingly melancholic lyrics.

MUSICAL PROFILE (The Vibe):

Generate a high-energy Tech House / Deep House club track. The BPM must be locked around 121. The sonic profile requires a massive Danceability rating of 0.78 and a pounding Energy level of 0.82. The beat should be a hypnotic four-on-the-floor rhythm with a deep, pulsating sub-bass and euphoric synth drops. Do NOT make it sound like cheerful pop; make it sound like a late-night rave.

LYRICAL PROFILE (The Story):

Write verses and a chorus that explore themes of heartbreak, betrayal, or profound loss. The vocal delivery should be emotional and haunting, contrasting sharply with the aggressive, dancefloor-ready beat.
